To Whom it May Concern:

My name is Dr. John Franzen, and I am an established PrTMS® provider with a clinic located in Omaha, Nebraska. It has been a pleasure to work alongside Dr. Murphy and PeakLogic, Inc. providing PrTMS therapy to my current patient population. As an addiction psychiatrist, I have the unique opportunity to provide a treatment that is unmatched by any other treatment modality on the market.

As a provider and business owner, PeakLogic and PrTMS® has provided me a unique opportunity to utilize a treatment that is a safe, non-medication, pain free approach to treating a number of illnesses including depression, anxiety, insomnia, concussions, autism, ADHD, and brain fog. Receiving treatment with PrTMS and PeakLogic has been a life changing experience for many individuals I have worked with who have "tried everything." Patient's have expressed having improved mood, reduced anxiety, improved sleep, improved mental clarity, better sleep quality, and sustained energy levels during the day. To be able to provide a treatment that has the ability to be transformational in someone's life and not just another transactional approach has been an amazing experience.

The team at PeakLogic, Inc. has been great to work with. They have been able to provide training and on-going support throughout the entire process of starting a new clinic to where I am at today. They have always been responsive and available to answer questions when needed. I have had a million questions along the way and have always felt supported throughout this entire process. They have been great to work with from day one.

I recommend PrTMS® because there is truly nothing like this on the market. This type of treatment provides a customized and personalized treatment approach that can help improve the quality of life for the people you are providing care. It is safe, effective, and is as minimally invasive as you can get with also being precise and tailored to each patient you work with. It does not carry the same side effects as other treatment modalities (medications, other neuromodulation techniques) and is well tolerated. The PeakLogic team and PrTMS is ahead of the current treatment curve with its service and personalized treatment that it provides. I would recommend this to anyone who wants to help the patient's they are treating.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Franzen".
