To Whom It May Concern:

My name is Teresa Anderson, MD of the Anderson Clinic in Cincinnati, Ohio. I am an adult outpatient psychiatrist that offers psychotherapy medication management, Ketamine infusions, and PrTMS for patients who have treatment resistant depression, anxiety and PTSD.

I have had the pleasure of working with Dr. Kevin Murphy of MindSet San Diego for the past four years, utilizing his expertise and software in order to deliver in-office EEG's and PrTMS treatment to my patients. We trained with his team in San Diego, in his satellite office in Indiana, and his team came to help us with the grand opening of this side of our clinic.

Dr. Murphy's staff, technicians, and software people are consummate professionals and frequently have the answers to our questions by the end of the next business day. Dr. Murphy himself has been available to me (bar when travelling) to answer my questions about difficult cases and has been amazingly helpful, thoughtful and kind. He has promoted my clinic on his website as well as doing public talks and helping with marketing flyers of the speaking engagements.

Patients have seen close to a 90% efficacy rate of improvement which is practically unheard of in the mental health field! Most treatments offer a paltry 30% improvement of symptoms except for ECT, which counts closer to 70% efficacy but carries with it the potential for serious memory issues. Our patients' lives are being changed for the better and I am happy to help get the word out for this amazing treatment!

On a personal note, Dr. Murphy is a born teacher and breaks down difficult concepts, making them easy to understand from the health professional to the lay person. This was by far the best business decision I've ever made.

Respectfully,

Teresa M. Anderson, MD
